The report of the round table on the topic "The need to use artificial intelligence in writing scientific articles " according to the action plan of the Council of Young Scientists for the 2025-2026 academic year:

Date: January 06, 2026

Venue: International University of Tourism and Hospitality, auditorium 314 of the academic building.

The organizer of the event: Ulsara Nematullayevna Kurmanbayeva, PhD.

On January 06, 2025, the language school organized a round table for young scientists, doctoral students, undergraduates and students. The main topic of the seminar was a report on the practice of using artificial intelligence in scientific research.

In accordance with the work plan of the language school for young scientists, a round table was organized and held on the topic "The need to use artificial intelligence in writing scientific articles." The purpose of the event is to discuss ways to effectively use modern digital technologies, including artificial intelligence tools, when writing research papers by young scientists.

The round table was attended by young scientists who presented their reports. The reports extensively discussed the possibilities of artificial intelligence in the preparation of scientific texts, data analysis, text structuring, its role in improving language literacy and its effectiveness in terms of saving time. In addition, special attention was paid to the issues of maintaining academic integrity, the proper use of sources and copyright responsibility when using artificial intelligence.

During the event, an open discussion was organized between the participants, where young scientists shared their experiences. The participants noted that the use of artificial intelligence tools as an aid in writing scientific articles contributes to improving the quality of scientific work.

Following the results of the round table, it was concluded that there is a need for effective and ethical use of artificial intelligence in scientific activities, and further recommended the organization of practical seminars and training events in this area.
