

Report on the event on the topic: "Writing and publishing a scientific article: a practical guide for undergraduates and students" in accordance with the action plan of the Council of Young Scientists for the 2025-2026 academic year:

Date: September 29, 2025

Venue: International University of Tourism and Hospitality, Rector's Office Auditorium.

Lecturer: Anastasia V. Gubarenko, PhD, Acting Associate Professor

On September 29, 2025, an open seminar for young scientists, doctoral students, undergraduates and students was held in the auditorium of the International University of Tourism and Hospitality. The main topic of the seminar was "Methodological foundations of scientific research publication: articles and monographs".

The main purpose of this event is to direct young researchers to publish scientific papers in accordance with international standards, explain the basic principles of writing scientific articles and monographs, and help improve the quality of scientific publications.

Lecturer Gubarenko Anastasia Vyacheslavovna focused on several important aspects of the publication of research papers:

1. The basics of publishing scientific articles

- Article structure: Introduction, literature review, methodology, results, discussion, conclusion;
- Requirements for international indexed journals;

- Features of scientific style and academic writing.
- 2. Rules for the preparation of a monograph:
 - The difference between a scientific monograph and a textbook;
 - Stages of writing a monograph: drawing up a plan, summarizing sources, determining scientific novelty;
 - The procedure for submitting the monograph to the press.
- 3. Academic integrity in scientific publications:
 - Creation of citation and link rules;
 - The value of anti-plagiarism verification programs;
 - Problems of copyright and scientific ethics.
- 4. International experience and opportunities:
 - Journals in Scopus, Web of Science databases;
 - Publication in the materials of international conferences;
 - Joint research projects and author's articles.

The seminar was actively attended by the faculty, doctoral students, undergraduates and students of the university. The participants were active, and many questions were asked. Exactly:

How do I choose the right magazine to publish?

What are the ways to publish a monograph internationally?

Are there effective ways to completely avoid plagiarism in scientific work?

How long does the review process take in foreign journals?

The lecturer answered all the questions using specific examples and offered useful tips from his experience. The seminar was organized at a high level and was very useful for the audience. Following the results of the event, the participants:

He is proficient in the methodological foundations of the preparation of scientific articles and monographs;

I got acquainted with the features of publication in international publications;

I have learned practical ways to effectively present the results of scientific research;

I became convinced of the importance of the principles of academic integrity.

This seminar has made a great contribution to increasing the scientific potential of young researchers and their integration into the international scientific community.
